

Healthcare Electricians Seminar

with Randy Stoddard, Julian Wells and Michal Hofkin

8 CEUs will be granted for attendance

Who Should Attend?

Electrical Contractors and Journeymen

Healthcare Facility Electricians

Electrical Inspectors and Plans Examiners

Electrical Engineers and Designers

Facilities Managers and Maintenance Supervisors

Project Managers working in Healthcare

AHJs

Regulatory Compliance Experts

Anyone looking to deepen their understanding of NEC, NFPA 99 and UL Standards

Join the Independent Alliance of the Electrical Industry's Benjamin Franklin Chapter for an engaging, industry-focused seminar tailored to today's healthcare environment.

National Electrical Code

Get up to speed on the latest NEC requirements, including critical updates and major changes impacting healthcare occupancies.

Why Healthcare?

Healthcare electrical systems demand seamless integration across life safety, emergency power, infection control, and patient care operations. These facilities operate in a highly regulated, constantly changing environment where reliability is essential and the margin for error is exceptionally small.

NFPA 99 - Health Care Facilities Code

Dive into the Health Care Facilities Code and learn how its requirements shape safe, reliable, and compliant healthcare facilities.
